WAP to Implement Query String

Passing a querystring = require("querystring")

```
const query = 'name=JohnDoe&age=30&  
city=NewYork';
```

```
const parsed = querystring.parse(query);
```

```
console.log(parsed);
```

Output

```
{  
  name: 'JohnDoe',  
  age: '30',  
  city: 'NewYork'  
}
```
